Portfolio

PROFILE SUMMARY

A result-oriented individual with around 2 years of experience as a Full Stack Web Developer in the product-based industry, specializing in **NodeJS, ExpressJS, MongoDB, JavaScript, SQL, ReactJS, Angular, Redux, HTML, and CSS**. Passionate about working in the software industry to demonstrate skills and enhance capabilities.

TECH SKILLS

HTML | CSS | JavaScript | TypeScript | ReactJS | Redux | Redux-Thunk | AngularJS | Node.js | ExpressJS | SQL | Mongoose | Sequelize | MySQL | MongoDB | Git | GitHub | Postman | MySQL Workbench | VS Code | Webstorm | Data Structures & Algorithms

SOFT SKILLS

Collaboration | Attention to Detail | Adaptability | Team Work | Remote Work

EDUCATION

Full Stack Web Development course

Masai School, Bangalore
Jan 2022 - Oct 2022

B.Tech. Civil Engineering

JECRC College Jaipur, Rajasthan
Aug 2015 - May 2019

ACCOMPLISHMENTS

- Secured 1st position at intercollege volleyball tournament, annual sports meet 2018.

HOBBIES/INTERESTS

- Cooking and travelling
- Playing outdoor games

WORK EXPERIENCE

Dec 2022 - Aug 2024 | Software Engineer | Cointab Software Pvt. Ltd., Mumbai

Responsibilities:

- Engineered a system to export data from internal systems to external system's APIs.
- Developed and implemented a complete system for seamless **integration with third-party APIs**.
- Designed and developed pivot tables maintaining the hierarchy of configuration levels through code enhancing the data analysis capabilities and improved reporting.
- Created a proprietary API for secure data upload and download, facilitating external API agent's interactions by streamlining data exchange processes, resulting in faster and more reliable data transfers.
- Developed a robust system to pull data from external databases and ensure continuous synchronization with internal SQL databases.

Tech Stack: Node.js | ExpressJS | SQL | **MySQL** | **Sequelize** | AngularJs | JavaScript | CSS | HTML | **Bootstrap** | Git | Github | Postman

PROJECTS EXECUTED

Foodie App :

Foodie is food ordering app designed to enhance the dining experience. It was a collaborative project.

Features:

- Register/Login
- Add, update, and remove restaurants from dashboard
- Add to cart/remove from the cart
- Checkout
- Razorpay Payment Integration for payment processing

Area of Responsibilities:

- Developed RESTful APIs with MongoDB and NodeJS, including secure authentication using Bcrypt and JWT.
- Integrated Razorpay for secure payment processing.
- Built responsive UI and key pages (restaurant listing, single restaurant, cart) using ReactJS and Chakra UI.
- Designed middleware for request handling, authentication, and validation.

Tech Stack: Node.js | ExpressJS | MongoDB | ReactJS | Redux | Bcrypt | JSON Web Token

Bitrix Clone:

Bitrix24 is a platform for managing and tracking client and partner interactions. It was a collaborative project.

Features:

- Register/Login
- Calendar Scheduling, Managing and tracking team tasks and projects.

Area of Responsibilities:

- Managed the Login/signup using Bcrypt and JSON Web Token using MongoDB, and NodeJS. Headed Event handling on the calendar page and CRUD Operations on the server side.

Tech Stack: Node.js | ExpressJS | MongoDB | ReactJS | Redux | Bcrypt | JSON Web Token
