## SUMMARY

A result-oriented individual with around 2 years of experience as a Full Stack Web Developer in the product-based industry, specializing in NodeJS, ExpressJS, MongoDB, SQL, ReactJS, AngularJS, Javascript, CSS, and HTML. Passionate about working in the software industry to demonstrate skills and enhance capabilities.

## EXPERIENCE

### Software Engineer

Cointab Software Pvt. Ltd., Mumbai

December 2022 – August 2024, Mumbai, India

- Engineered a system to export data from internal systems to external system's APIs.
- Developed and implemented a complete system for seamless integration with third-party APIs.
- Designed and developed pivot tables maintaining the hierarchy of configuration levels through code enhancing the data analysis capabilities and improved reporting.
- Created a proprietary API for secure data upload and download, facilitating external API agent interactions by streamlining data exchange processes, resulting in faster and more reliable data transfers.
- Developed a robust system to pull data from external databases and ensure continuous synchronization with internal SQL databases.
- Tech Stack : Node.js | ExpressJS | MySQL | Sequelize | AngularJS | Javascript | HTML | CSS | Git | Github | Postman

## PROJECTS

### Foodie

Self • [foodie-goals.netlify.app/](https://foodie-goals.netlify.app/) • October 2022 – April 2024

- Collaboration: GitHub – <https://github.com/Bhavesh2302/quad-goals/>
- Developed RESTful APIs and server-side logic, implemented database schemas and queries using MongoDB and NodeJS.
- Implemented secure authentication and authorization mechanisms using Bcrypt and JSON Web Token.
- Successfully integrated Razorpay payment gateway for secure and efficient third-party payment processing on the server side.
- Developed the layout using Chakra UI and functionality of the restaurant listing page, single restaurant page, and cart page, ensuring responsiveness across different devices using ReactJS.

### Bitrix24 Clone

Masai School • [bitrix24-project.netlify.app/](https://bitrix24-project.netlify.app/) • September 2022 – September 2022

- Collaboration: GitHub – <https://github.com/Bhavesh2302/Bitrix-24-clone/>
- Managed the Login/signup using Bcrypt and JSON Web Token using MongoDB, and NodeJS. Handled Event handling on Calendar page and Crud Operations on the server side.

## EDUCATION

### Bachelor of Technology in Civil Engineering

Jaipur Engineering College and Research Centre • Jaipur, Rajasthan, India • 2019

## CERTIFICATIONS

### Full Stack Web Development Course, NSDC-Certified

Masai School, Bengaluru, Karnataka • 2022

## SKILLS

Front End: HTML, CSS, JavaScript, Typescript, ReactJS, Redux, AngularJS

Back End: Node.js, ExpressJS, Mongoose, Sequelize

Databases: MySQL, MongoDB

Tools & Technologies: Git, GitHub, Postman, VS Code, Webstorm, MySQL Workbench

Soft Skills: Collaboration, Team Work, Adaptability, Remote Work

Data Structures & Algorithms
